John Wiley Sons Inc, United States, 2013. Paperback. Book Condition: New. 2nd Revised edition. 244 x 170 mm. Language: English . Brand New Book. This new edition of the all in one textbook for the postgraduate study of valuation on real estate courses retains its focus on the valuation and appraisal of commercial and industrial property across investment, development and occupier markets. It is structured from the client perspective and covers single-asset pricing, risk and return issues. The structure of the book has been substantially revised. Part A introduces the key microeconomic principles, focussing on land as a resource, production functions, supply and demand and price determination. The locational aspect of real estate is also introduced. Macroeconomic considerations are categorised by the main market sectors (and their function); the market for land (development), for space (occupation) and for money (investment). The economic context is set and the author then explains why property valuations are required and discusses the main determinants of value and how they might be identified. The mathematics required to financially quantify value determinants are also introduced. Part B of the book describes the methods of valuation; Part C applies these methods to the valuation of a range of property types for a wide variety of purposes; and Part D covers investment and development appraisal. The author introduces valuation activities from a broad economic perspective, setting valuation in its business finance context and combining its academic and practical roots. Changes in this second edition include: * less daunting economics * expanded companion website with PowerPoint slides for lecturers, self-test Questions Answers for students: see * up-to-date case studies and sample valuations * reference to the newly-published Red Book (the valuer s bible) Property Valuation with its user-friendly format, using tried-and-tested teaching and learning devices and a clear writing...
