Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1840 Excerpt: .according to the structure of the joint, to prevent a return of the dislocation. After reducing the lower jaw, it will be sufficient to pass a strap under the jaw, and to pin the ends of it together at the top of the head, so as to prevent the patient from opening his mouth wide. After reducing the dislocated humerus, let the elbow be brought inwards and forwards, and laid upon the chest at the outer side of the mamma. Then let a thick and hard compress be laid on at the inner side of the acromion, and supported by a few turns of a spica bandage; after which the sleeve should be pinned to a waistcoat, and the fore-arm hung in a sling or scarf, and after reducing the dislocated elbow, and bending the fore-arm to a right angle with the humerus, a thick and long timber-splint ought to be laid on the outside of the The foot has sometimes been dislocated forwards, by force applied to the foot or fore part of the leg whilst the limb is fixed. The symptoms are, elongation of the foot, combined with shortening of the heel. Luxation may also take place backwards, by which the foot is shortened and the heel elongated. In these cases one of the malleoli has been sometimes split. The reduction, which is sometimes very difficult, is made by pulling the foot whilst the leg is fixed, and making pressure backwards or forwards as..
